

Roof Watch

SLATE AND TILE EDITION

Slate and Tile Roofs (Historically the best roofs for many buildings)

- Do you have the facts on what to do when repairs and maintenance are needed?
- Things a qualified contractor can do to lengthen the life expectancy.
- When replacement is required, what materials to choose and use.
- Enhance the value of your building or church by speaking to a qualified roofing professional with many years of experience who can help you make the proper choices.

Slate and tile roofs are designed in such a way that they can be taken apart and put back together without removing the entire roof. **When done correctly, the repair is nearly invisible. Don't be fooled by amateur work.** Using tar, or any other poor substitute is not only unsightly and ineffective against preventing leaks; it will cause permanent damage to the slates.

Keep the historic beauty and strength alive by carefully selecting craftsmen to **repair your roof with the same skill and technique as originally designed, to last for hundreds of years.**

Why Choose Pfister?

Offering great products means little unless they are professionally installed. **PFISTER** employees are craftsmen with over 100 combined years of experience. With every **PFISTER** installation, we treat you and your property with the respect you deserve. Call us today to find out more about how **PFISTER** can help you.
